Building with AI

Industrial AI Index

industrial-ai.radhakrishnakamaraju.com

Free AI-readiness assessment for manufacturers: a high-level or detailed questionnaire across four areas, scored and turned into a tailored report written by Claude. Built to be safe in public: answers validated on the server, prompt kept server-side, per-visitor and daily limits, nothing stored, and a rule-based fallback if the AI is unavailable.

`Claude API` `Node.js` `Docker` `Playwright tests`

Clawdia

personal AI assistant

An assistant I run on my own server and talk to on Telegram. I documented the whole build in a ten-day public series, including what broke.

`OpenClaw` `Telegram` `Self-hosted` `Docker`

Ask this site

assistant on my website

Answers visitor questions only from a curated knowledge file. It declines private or off-topic requests, ignores attempts to override its rules, strips any link not on an allow-list, and runs under rate limits and a spend cap.

`Claude API` `Prompt guardrails` `Rate limiting`

Personal website and its pipeline

radhakrishnakamaraju.com

Site, assessment and assistant run as separate containers behind one HTTPS proxy, with push-to-deploy from public GitHub repositories. Built end to end with AI-assisted development, then tested in a real browser.

`GitHub` `Traefik` `Cloudflare` `Linux VPS`

Relevant Experience

PMO & Digital Transformation Lead

03/2026 – Present

Tech Mahindra, embedded at a global automotive powertrain joint venture

- Lead PMO and digital transformation across a multi-entity joint venture, connecting IT synergy, governance and the transformation roadmap.
- Designed the IT synergy and digital maturity frameworks used to prioritise investments.
- Run the Microsoft tenant consolidation workstream: options, scoring and decision rights across three entities.

AI Enablement & Offerings Manager, Manufacturing

06/2025 – 02/2026

Tech Mahindra

- Built AWS and NVIDIA partnerships to co-develop AI solutions for European manufacturers, and qualified AI use cases against quantified ROI.
- Designed commercial and pricing models for the manufacturing AI practice.
- Led a carve-out progress assessment that led to my current engagement.

Customer Delivery Manager

2020 – 2025

Tech Mahindra, for the European HQ of a Japanese automotive OEM

- Owned delivery, governance and RFPs for an account of about €10M overall contract value, with a team of up to 120.
- Grew the Aftersales SAP account from a minor enhancement into a fixed-price forecasting and replenishment win, then the S/4HANA Phase 1 win.

Skills

AI building SHIPPED

Claude API and prompt design
Grounded assistants with guardrails
Self-hosted agents (OpenClaw)
AI-assisted development with Claude

AI building IN PROGRESS

Agentic AI: multi-step agents
Personal OS: a team of agents, one new agent a month
Physical AI, learning in public

Engineering & platforms

Node.js, JavaScript, HTML/CSS, Docker and Compose, Traefik, Linux VPS, Cloudflare, Git and GitHub, Playwright

Delivery & leadership

Programme governance, PMO, executive engagement, pre-sales and proposals, IT synergy, SAP S/4HANA, Agile / SAFe

Education & Certifications

B.E. Electronics & Communication
Anna University, Chennai

AWS Certified Solutions Architect, Associate
AWS Generative AI Essentials
NVIDIA AI Sales Curriculum
DeepLearning.AI Deep Learning Specialization
Tech Mahindra AI Brown Belt
SAFe 5.0 Agilist

Languages

English fluent
French B1 (TEF certified)

Beyond work

Fashion photographer, publishing as Apertures by RK and in Fashion Magazine24, including Paris Haute Couture Week.
